

Product Features

- Available in capacities of 24 kW (MDX 30) and 48 kW (MDX 60)
- Robust design
- Very easy to maintain
- Runs on R32, energy-efficient and more environmentally friendly
- Air-to-air heat pump
- Cooling and heating
- Large temperature range
- Indoor unit equipped with EC fan
- Suitable for hybrid setup with gas-fired or electric heaters
- Optional integrated condensate pump
- Pipe lengths up to 60 m
- Refilling not necessary up to 30 m
- Isolator switch pre-assembled on indoor unit
- Ambient temperature range indoor unit
 - Cooling: 17°C (80%) to 41°C (25%)
 - Heating: 7°C to 24°C

Sustainable heating and cooling with the Mark MISTRAL MDX

The Mistral MDX is specially developed for energy-efficient heating and cooling of large spaces. The combination of an air-to-air heat pump (outdoor unit) with a compact air heater/cooler (indoor unit) ensures excellent performance and a versatile, energy-efficient climate solution.

More environmentally friendly and flexible

Thanks to the use of R32 as a refrigerant, this new generation MDX is a more environmentally friendly climate solution. The long available pipe length and the wide temperature range make the Mistral MDX versatile. Because the Mistral MDX has been specifically developed for industrial use, it is extremely suitable for heating and cooling e.g. garages, warehouses, workshops, distribution centres and showrooms.

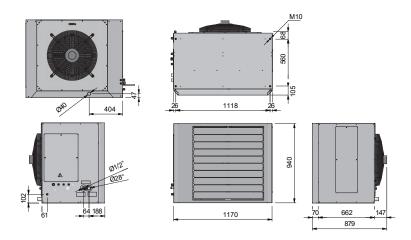

Hybrid-ready: flexible and cost-saving

The hybrid preparation ensures that the system works seamlessly with new or existing gas-fired air heaters. This means that the installed capacity of the Mistral MDX can remain lower, because the gas-fired units provide the required capacity in severe cold.

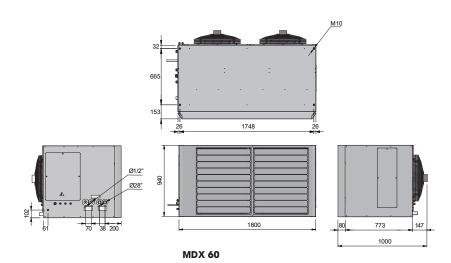

The Mistral MDX 30 and MDX 60 are flexible climate solutions that provide significant savings on energy costs. Contact us for the possibilities.
